Manual, Position X means the leadscrew is

dis-engaged from the box. You generally run

the machine with the lead screw in X. You

should have feeds though. The "bars" under

the carriage are the leadscrew, feed drive

rod, and the rod that controls the on-off

switch. The on-off rod is attached to the

switch linkage under the indices plate on the

gearbox., The only fully geared headstock

centre lathe in the range, the M300 has

Older Harrison Models Harrison 10AA

(Chipmaster) A heavily built, if conventionally

designed industrial-quality lathe, the M400

had an exceptionally deep (380 mm - 15") and wide (360 mm - 14.125") bed., Like all Harrison lathes the new geared head lathes are guaranteed to turn within .0001". But, beyond the accuracy you expect from Clausing/Harrison, the new geared head lathes are built rugged for durability and long-lasting quality., Some other Harrison manual lathes wandered a bit (M390 from Taiwan ??) until Harrison decided to make the manual machines in China. The later UK built M300 had a facelift to the black and white scheme and change of control knobs and headstock design., HARRISON M300 165mm (6.5") Centre lathe with induction ...
