photography is the science of taking pictures

of very fast phenomena. In 1948, the Society

of Motion Picture and Television Engineers

(SMPTE) defined high-speed photography as

any set of photographs captured by a

camera capable of 69 frames per second or

greater, and of at least three consecutive

frames. High-speed photography can be

considered to be the opposite of time-lapse

..., A power semiconductor device is a

semiconductor device used as a switch or

rectifier in power electronics; a switch-mode

power supply is an example. Such a device

is also called a power device or, when used

in an integrated circuit, a power IC.. A power

semiconductor device is usually used in

"commutation mode" (i.e., it is either on or

off), and therefore has a design optimized for

such usage ..., ON Semiconductor offers a
