[http://ece.uwaterloo.ca/~ccanizar/papers/IEEE
EBenchmarkTFreport.pdf](http://ece.uwaterloo.ca/~ccanizar/papers/IEEEBenchmarkTFreport.pdf), reduction and bus
voltage improvement. The application of a
genetic algorithm is applied to determine the
optimal on/off patterns of the switches to
minimize the system loss subject to system
constraints. The effectiveness of the
methodology is demonstrated by a practical
sized distribution system consisting of 33
buses., ICGICT Allocation of DG for IEEE 33
Bus Systems S.Ishwarya1, P.R.Surya2 P.G

M.Kumarasamy college of Engineering,
Karur , Tamilnadu, India 2 ABSTRACT -
Recently, integration of Distributed

generation (DG) in distribution system has
increased to high penetration levels.,
transmission system sub-transmission
system transmits energy at a lower voltage
level to the distribution substations.
Generally, sub-transmission systems supply
power directly to the industrial customers.
The distribution system is the final link in the
transfer of electrical energy to the individual
customers., Optimal ESS Allocation and
