Optimization is the act of achieving the best
possible result under given circumstances. In
design, construction, maintenance, ...,
engineers have to take decisions., Everyone
uses control loops. Anytime you adjust how
you do something based on previous results,
you are forming your own control loop. For
example, when you want to drive your car at
65 mph, you depress the accelerator until the
speedometer reports the target speed â€”

design is the art and science of enhancing
the interior of a building to achieve a
healthier and more aesthetically pleasing
environment for the people using the space.
An interior designer is someone who plans,
