- Search results, Introduction to Algorithms is a book by Thomas H. Cormen, Charles E. Leiserson, Ronald L. Rivest, and Clifford Stein. The book has been widely used as the textbook for algorithms courses at many universities and is commonly cited as a reference for algorithms in published papers, with over 10000 citations documented on CiteSeerX. This is the first tutorial in the "Livermore Computing Getting Started" workshop. It is intended to provide only a very quick overview of the extensive and broad topic of Parallel Computing, as a lead-in for the tutorials that follow it. Top 10 algorithms in data mining 3 After the nominations in Step 1, we verified each nomination for its citations on Google Scholar in late October 2006, and removed those nominations that did not have at least 50. Parallel computing is a type of computation in which many calculations or the execution of processes are carried out

simultaneously. Large problems can often be divided into smaller ones, which can then be solved at the same time., GAMS: The Modelling Language Sets i canning plants / seattle, san-diego / j markets / new-york, chicago, topeka / ; Parameters  $a(i)$  capacity of plant  $i$  in cases, The Art of Computer Programming, Volume 4, Fascicle 0: Introduction to Combinatorial Algorithms and Boolean Functions [Donald E.
