INTRODUCTORY ELECTROMAGNETICS

BY POPOVIC AND POPOVIC SOLUTIONS

PDF - Search results, Skin effect is the tendency of an alternating electric current (AC) to become distributed within a conductor such that the current density is largest near the surface of the conductor, and decreases with greater depths in the conductor. The electric current flows mainly at the "skin" of the conductor, between the outer surface and a level called the skin depth., Free Engineering Books - list of freely available engineering textbooks, manuals, lecture notes, and other documents: electrical and electronic engineering, mechanical engineering, materials science, civil engineering, chemical and bioengineering, telecommunications, signal processing, etc.
