Search results, FIXTURES It is a work
holding device that holds, supports and
locates the workpiece for a specific operation
but does not guide the cutting tool., A jig is a
type of custom-made tool used to control the
location and/or motion of parts or other
tools., well as the variety of projects we have
participated to. The aim of this handbook is
to highlight the importance of these technical,
A fixture is a work-holding or support device
used in the manufacturing industry. Fixtures
are used to securely locate (position in a
specific location or orientation) and support
the work, ensuring that all parts produced
using the fixture will maintain conformity and
interchangeability., The Frame Jig Many
potential frame builders have the mistaken
idea that the frame jig must be extremely
accurate, built like a precision timepiece and
yet possess immense strength for bending

and holding the tubing sections in position for
welding but in fact, 2016 Canadian
