LECTURE NOTES ON CRYPTOGRAPHY

UCSD CSE PDF - Search results, Online number theory lecture notes and teaching materials. Online Math Courses, videos and lectures from leading universities. This has links to some excellent number theory courses. Algebraic Number Theory and commutative algebra, lecture notes by Robert Ash ; Lecture notes on p-adic numbers and introductory number theory (Andrew Baker) ; Algebraic number theory notes (Matt Baker - pdf), Elliptic-curve cryptography (ECC) is an approach to public-key cryptography based on the algebraic structure of elliptic curves over finite fields. ECC requires smaller keys compared to non-ECC cryptography (based on plain Galois fields) to provide equivalent security.. Elliptic curves are applicable for key agreement, digital signatures, pseudo-random generators and other tasks., Post-quantum cryptography (sometimes referred to as quantum-proof, quantum-safe or quantum-resistant) refers to cryptographic algorithms (usually public-key algorithms)

that are thought to be secure against an attack by a quantum computer. As of 2018, this is not true for the most popular public-key algorithms, which can be efficiently broken by a sufficiently strong hypothetical quantum computer., Kristin Lauter is a Principal Researcher and Research Manager for the Cryptography group at Microsoft Research. Her research areas are number theory and algebraic geometry, with applications to cryptography. She is particularly known for her work on homomorphic encryption, elliptic curve ..., Here you can download Regulation 2013 ECE Notes.
