LIFE AND DEATH IN SHANGHAI NIEN  
CHENG PDF - Search results, Death is the  
cessation of all biological functions that  
sustain a living organism. Phenomena which  
commonly bring about death include aging,  
predation, malnutrition, disease, suicide,  
homicide, starvation, dehydration, and  
accidents or trauma resulting in terminal  
injury., Life is a characteristic that  
distinguishes physical entities that have  
biological processes, such as signaling and  
self-sustaining processes, from those that do  
not, either because such functions have  
ceased (they have died), or because they  
never had such functions and are classified  
as inanimate., God Is With Us: What
