The older 2nd edition of the text may also be used. The material is fundamentally the same in all editions and all homework assignments will be made available as printable PDFs. Additional supplements on various topics in differential equations will also be made available during the course.,

Definition. A matrix is a rectangular array of numbers or other mathematical objects for which operations such as addition and multiplication are defined. Most commonly, a matrix over a field F is a rectangular array of scalars each of which is a member of F. Most of this article focuses on real and complex matrices, that is, matrices whose elements are real numbers or complex numbers ...,

matemática, una matriz es un arreglo bidimensional de números. Dado que puede definirse tanto la suma como el producto de matrices, en mayor generalidad se dice que son elementos de un anillo. Una matriz se representa por medio de una letra mayúscula (A, B...) y sus elementos con la misma letra en minúscula (a, b...), con un doble subíndice donde el primero indica la fila y el segundo la ...
