Acupuncture Artemisinin for cancer
Beta-mannan to reverse dysplasia of the
cervix Anti-Malignin antibody test for cancer,
The childhood disintegrative disorder (CDD),
also known as Heller's syndrome and
disintegrative psychosis, is a rare condition
characterized by late onset of developmental
delaysâ€”or severe and sudden
reversalsâ€”in language, social function, and
motor skills. Researchers have not been
successful in finding a cause for the
disorder. CDD has some similarity to autism,
and is sometimes considered ...
Human immunodeficiency virus (HIV) weakens a
personâ€™s immune system by destroying
important cells that fight disease and
infection. There is no cure for HIV, but with
proper medical care, HIV can be controlled.
Measles is a systemic infection. The primary
site of infection is the respiratory epithelium
of the nasopharynx. Two to three days after
invasion and replication in the respiratory
epithelium and regional lymph nodes, a
primary viremia occurs with subsequent
infection of the reticuloendothelial system.
