offers., A Negative-feedback amplifier (or feedback amplifier) is an electronic amplifier that subtracts a fraction of its output from its

input, so that negative feedback opposes the original signal., Preface . This book is

intended for use in the core electronics courses for undergraduate electrical and computer engineering majors. The book

frequently takes the designer's point of view in discussing circuits, illustrates design with numerous examples, shows how to test

circuit designs using SPICE, and provides numerous open-ended design ..., 4
