MISSILE GUIDANCE AND CONTROL SYSTEMS PDF - Search results, The most common method of guidance is to use some form of radiation, such as infrared, lasers or radio waves, to guide the missile onto its target. This radiation may emanate from the target (such as the heat of an engine or the radio waves from an enemy radar), it may be provided by the missile itself (such as a radar), or it may be provided by a friendly third party (such as the radar of the ... , Longbow, Fire Control Radar and RF Longbow HELLFIRE, Fire-and-Forget Missile for the Apache, A cruise missile is a guided missile used against terrestrial targets that remains in the atmosphere and flies the major portion of its flight path at approximately constant speed. Cruise missiles are designed to deliver a large warhead over long distances with high precision. Modern cruise missiles are capable of travelling at supersonic or high subsonic speeds, are self-navigating, and are ... , Boeing's expertise in weapons extends to its Joint Direct Attack Munition,
