MISSILE GUIDANCE USING DUAL MODE SEEKER PDF - Search results, An early form of radar guidance was "beam-riding" (BR).In this method, the attacking aircraft directs a narrow beam of radar energy at the target. The air-to-air missile was launched into the beam, where sensors on the aft of the missile controlled the missile, keeping it within the beam., Astra went through a series of ground tests from 2003 till 2012 in three different configurations to validate the airframe, propulsion system, control system, dual mode guidance and night firing capability., June 6/16: The US Army has successfully fired Lockheed Martin's multi-mode Joint Air-to-Ground Missile from a UAV for the first time.Testing was conducted on an MQ-1C Gray Eagle at Dugway Proving Ground, Utah., ATLAS MISSILE SITE COORDINATES. First image: An Atlas launch, probably at Cape Canaveral. Second image: An Atlas F apparently undergoing either a Propellant Loading Exercise (PLX) or perhaps a Technical Acceptance Demonstration (TAD).
