sickness is a condition in which a

disagreement exists between visually

perceived movement and the vestibular

system's sense of movement. Depending on

the cause, it can also be referred to as

seasickness, car sickness, simulation

sickness or airsickness., The parallel motion

is a mechanical linkage invented by the

Scottish engineer James Watt in 1784 for the

double-acting Watt steam engine.It allows a

rod moving practically straight up and down

to transmit motion to a beam moving in an

arc, without putting significant sideways

strain on the rod., 4-2 CATIA V5 Tutorials in
