Search results, Near-field communication
(NFC) is a set of communication protocols
that enable two electronic devices, one of
which is usually a portable device such as a
smartphone, to establish communication by
bringing them within 4 cm (1.6 in) of each
other.. NFC devices are used in contactless
payment systems, similar to those used in
credit cards and electronic ticket smartcards
and allow mobile payment ..., As of April
2011, several hundred trials of near-field
communication have been conducted. Some
firms have moved to full-scale service
deployments, spanning either a single
country or multiple countries. Multi-country
deployments include Orange's roll-out of
NFC technology to banks, retailers,
transport, and service providers in multiple
European countries, and Airtel Africa and

abgekürzt NFC) ist ein auf der
RFID-Technik basierender internationaler

Übertragungsstandard zum kontaktlosen
Austausch von Daten per
elektromagnetischer Induktion mittels loser
gekoppelter Spulen über kurze Strecken
von wenigen Zentimetern und einer
Datenübertragungsrate von maximal 424
kBit/s., La comunicazione in prossimità,
anche chiamata near-field communication
(NFC), è una tecnologia che fornisce
connettività senza fili bidirezionale a corto
raggio (fino a un massimo di 10 cm). È stata
sviluppata congiuntamente da Philips, LG,
Sony, Samsung e Nokia, Near field
