Engineering noise control Figure 10.1.
Desired noise spectrum for an overall level of
90 dB(A). To adequately define the noise
problem and set a good basis for the control
strategy, the, Industrial Noise Control and
Acoustics was developed as a result of ...
designed to integrate the theory of acoustics
with the practice of noise control
engineering., 4. To determine the need
and/or extent of noise control of existing or
future noise sources. 5. To identify outdoor
noise sources and determine the extent of
their influence. 6. To obtain a description of
community noise for correlation with the
community's response to noise (see Chap.
23). 7., Noise Control Engineering (NCE) is a
premier acoustical engineering consulting
firm that specializes in noise and vibration
measurement and control for marine,
industrial and commercial applications.
Founded in 1991 by Raymond Fischer, NCE
is a Small Business that readily responds to
client needs., Practical Approaches to

Laboratory, Noise and Vibration Control
Engineering: Principles and Applications,
Second Edition is the updated revision of the
classic reference containing the most
important noise control design information in
a single volume of manageable size., "This
handbook is highly recommended for the
library of any organisation or company that
has any dealing with assessment and control
of noise and vibration." (Acoustics Australia,
Vol 35, No. 3) "It is recommended that this
book be close at hand for every acoustical
consulting and design engineer.,
