ORCHID PORTRAIT Lending Support By

Charles Marden Fitch Branches, Logs,

Plaques and Slabs Can Be Home to Orchids

â€œSUPPORT ME,â€• SHOUT THE

orchids., Orchids are easily distinguished

from other plants, as they share some very

evident, shared derived characteristics, or

synapomorphies.Among these are: bilateral

symmetry of the flower (zygomorphism),

many resupinate flowers, a nearly always

highly modified petal (labellum), fused

stamens and carpels, and extremely small

seeds. Stem and roots, While people can

often be intimidated by orchid maintenance,

in reality, these tropical flowers are very easy

to care for. Finding just the right area in your

home that provides the best light and

temperature is the first step., Growing

Phalaenopsis Orchids There are about 80

species found in nature. They are either

saprophytic, (grow on trees), or lithophytic,

(grow on rocks)., nederlandse versie klik hier
