L Joao Paulo Toledo. Abstract The purpose

of this activity was to apply thin layer

chromatography (TLC) to identify amino

acids present in an unknown sample., Thin

layer chromatography (TLC) is a widely

employed laboratory technique used to

separate different biochemicals on the basis

of their size and is similar to paper

chromatography.However, instead of using a

stationary phase of paper, it involves a

stationary phase of a thin layer of adsorbent

like silica gel, alumina, or cellulose on a flat,

inert substrate., Thermo Fisher Scientific is
