Dune Sciences, Inc., The particle-size

distribution (PSD) of a powder, or granular

material, or particles dispersed in fluid, is a

list of values or a mathematical function that

defines the relative amount, typically by

mass, of particles present according to size.,

Particle size is a notion introduced for

comparing dimensions of solid particles

(flecks), liquid particles (droplets), or

gaseous particles (bubbles).The notion of

particle size applies to colloidal particles,

particles in ecology, particles present in

granular material (whether airborne or not),

and particles that form a granular material ...,
