results, Providing researchers with access to
millions of scientific documents from journals,
books, series, protocols and reference
works., The Kaufman Assessment Battery for
Children (KABC) is a clinical instrument
(psychological diagnostic test) for assessing
cognitive development. Its construction
incorporates several recent developments in
both psychological theory and statistical
methodology. The test was developed by
Alan S. Kaufman and Nadeen L. Kaufman in
1983 and revised in 2004. . The test has
been translated and adopted ..., BibMe Free
Bibliography & Citation Maker - MLA, APA,
Chicago, Harvard, The California Verbal
Learning Test (CVLT) is one of the most
widely used neuropsychological tests in
North America. It is a relatively new
approach to clinical psychology and
computer science. It is a measure of episodic
verbal learning and memory, which

demonstrates sensitivity to a range of clinical
conditions. The test does this by attempting
to link memory deficits with impaired ...,
Introduction. The diagnosis of cancer in
children and adolescents is a life-altering
event for them as well as their families.
Although advances in treatment have
increased the overall 5-year survival rate
for childhood cancers to approximately 80%,
cancer is still the second leading cause of
death (following accidents) in children aged 5
to 14 years. 1, 2 Depending on the type of
cancer ..., 2 Handbook of Pediatric
