PETROLEUM REFINERY PROCESS

ECONOMICS PAPERBACK 2000 AUTHOR

ROBERT E MAPLES PDF - Search results,

Oil refinery or petroleum refinery is an

industrial process plant where crude oil is

transformed and refined into more useful

products such as petroleum naphtha,

gasoline, diesel fuel, asphalt base, heating

oil, kerosene, liquefied petroleum gas, jet fuel

and fuel oils., Flow diagram of a typical

petroleum refinery. The image below is a

schematic flow diagram of a typical

petroleum refinery that depicts the various

refining processes and the flow of

intermediate product streams that occurs

between the inlet crude oil feedstock and the

final end-products., Refining U.S. Petroleum
