(Page 1) Despite the prevalence of pressure

vessels in the chemical process industries

(CPI), a clear understanding of the

basis-of-design responsibilities involved in

designing, fabricating and repairing such a

device remains elusive. Vessel users are

responsible for providing all necessary data

to ensure the manufacturer can design and

fabricate a pressure vessel in full compliance

with the ..., Recently while trying to finalize a

nameplate issue, I had an interesting

discussion with one of our fab shops. They

kept showing the vessel design pressure (50,

of this regulation. 3 (1) This regulation

applies in respect of every boiler and boiler

plant, every pressure plant, every pressure

vessel, every pressure piping system, every

fitting, every plant and all refrigeration

equipment and refrigeration plants. (2)

Despite subsection (1), this regulation does

not apply to any of the following: ...,

Mathematically:  $P = \frac{F}{A}$ , where:  $P$  is the pressure,  $F$  is

the magnitude of the normal force,  $A$  is the

area of the surface on contact. Pressure is a

scalar quantity. It relates the vector surface

element (a vector normal to the surface) with

the normal force acting on it., Designation: D
