There are many different types of dental material, and their characteristics vary according to their intended purpose., Negative-index metamaterial or negative-index material (NIM) is a metamaterial whose refractive index for an electromagnetic wave has a negative value over some frequency range., 2 Rev: June 1998 A second property that results by forming a composite such as FRP is that the material is now heterogeneous. That is, its composition varies as you move from point to point through the material., 1 General Principles 1 Last updated August 2014 Guidelines for Technical Material 1 General Principles 1.1 Spacing 1.1.1 The layout of the print should be preserved as
