taking and highlighting while reading

Psychology, Canadian Edition., Transduction

in general is the transportation or

transformation of something from one form,

place, or concept to another. In psychology,

transduction refers to reasoning from specific

cases to general cases, typically employed

by children during their development. The

word has many specialized definitions in

varying fields. Furthermore, transduction is

defined as what takes place when many ...,

Evolutionary psychology is a theoretical

approach in the social and natural sciences

that examines psychological structure from a

modern evolutionary perspective. It seeks to

identify which human psychological traits are

evolved adaptations – that is, the functional

products of natural selection or sexual

selection in human evolution. Adaptationist

thinking about physiological mechanisms ...
