Python is quickly becoming the most popular  
introductory programming language for both  
students and instructors., This book  
describes Python, an open-source  
general-purpose interpreted programming  
language available for a broad range of  
operating systems. There are currently three  
major implementations: the standard  
implementation written in C, Jython written in  
Java, and IronPython written in C# for the  
.NET environment., Python is an interpreted  
high-level programming language for  
general-purpose programming.Created by  
Guido van Rossum and first released in  
1991, Python has a design philosophy that

Context Managers¶. Context managers  
allow you to allocate and release resources  
precisely when you want to. The most widely

Compound statements contain (groups of) other statements; they affect or control the execution of those other statements in some way., Hands-on Python Tutorial, Release 1.0 for Python Version 3.1+ 1.1.2Why Python There are many high-level languages. The language you will be learning is Python., The official home of the Python Programming Language, The syntax of the Python programming language is the set of rules that defines how a Python program will be written and interpreted (by both the runtime system and by human readers)., Python is a multi-domain, interpreted programming language. It is a widely used general-purpose, high-level programming language. It is often used as a scripting language because of its forgiving syntax and compatibility with a wide variety of different eco-systems. Its flexible syntax enables ..., It is sometimes said that Python, compared to low-level languages such as C++, improves development time at the expense of runtime. Fortunately, there are a handful of ways to speed up operation runtime in Python without sacrificing ease of use., Facade is a Design

Availability: Windows. sys.displayhook (value) ¶ If value is not None, this function prints it to sys.stdout, and saves it in \_\_builtin\_\_., The book that teaches you how to write scalable, distributed Python applications., 20. for/else ¶. Loops are an integral part of any language. Likewise for loops are an important part of Python. However there are a few things which most beginners do not know about them.
