Cement Association of Canada., Concrete,

usually Portland cement concrete, is a

composite material composed of fine and

coarse aggregate bonded together with a

fluid cement (cement paste) that hardens

over time"most frequently a lime-based

cement binder, such as Portland cement, but

sometimes with other hydraulic cements,

such as a calcium aluminate cement.It is

distinguished from other, non-cementitious

types of concrete ..., 2 5th Edition 2009 1.1.

OBJECTIVE The purpose of this handbook is

to give the users, designers, specifiers and

installers of precast concrete, Rebar (short

for reinforcing bar), collectively known as

reinforcing steel and reinforcement steel, is a

steel bar or mesh of steel wires used as a

tension device in reinforced concrete and

reinforced masonry structures to strengthen

and hold the concrete in compression.

Concrete is strong under compression, but

has weak tensile strength.Rebar significantly

increases the tensile strength of ..., The
