reinforced concrete or GFRC is a type of
fiber-reinforced concrete. The product is also
known as glassfibre reinforced concrete or
GRC in British English. Glass fiber concretes
are mainly used in exterior building facade
panels and as architectural precast
concrete., Structural design of reinforced

T-beam (or tee beam), used in construction,
is a load-bearing structure of reinforced
concrete, wood or metal, with a t-shaped
cross section. The top of the t-shaped cross
section serves as a flange or compression
member in resisting compressive
stresses. The web (vertical section) of the
beam below the compression flange serves
to resist shear stress and to provide greater
separation for the ..., What is the
