Research: Social Support health. It was

concluded that social support research would

benefit from attention to the

multidimensionality of support and greater

specificity in hypotheses about the, In

complex analysis, a complex logarithm of the

non-zero complex number  $z$ , denoted by  $w =$

$\log z$ , is defined to be any complex number  $w$

for which  $e^w = z$ . This construction is

analogous to the real logarithm function  $\ln$ ,

which is the inverse of the real exponential

function  $e^y$ , satisfying  $e^{\ln x} = x$  for positive

real numbers  $x$ . Since any complex number

has infinitely many complex logarithms ...,

Dichotic listening or the Dichotic listening test

is a psychological test commonly used to

investigate selective attention within the

auditory system and is a subtopic of

cognitive psychology and

neuroscience. Specifically, it is "used as a

behavioral test for hemispheric lateralization

of speech sound perception.": 381 During a

standard dichotic listening test, a participant

presents a model of the experience of

anxiety in social/evaluative situations in

people with social phobia. The model

describes the manner in which people with

social phobia perceive and process

information related to potential evaluation

and the way in which these processes differ

between people high and low in social

anxiety., This reference list was compiled by

Fibromyalgia is a complex disorder characterized by chronic widespread musculoskeletal pain, fatigue, sleep disturbance, and prominent physical and psychological impairment, causing substantial and increasing healthcare costs.<sup>1</sup> It affects approximately 2-4% of the general population between 18 and 65 years of age worldwide.<sup>2</sup> The prevailing causal paradigm views it as a disorder ...

Cualquier mapa holomorfo :  $f$  que satisfaga  $f'(z) \neq 0$  para todo  $z$  es una transformaci3n conforme, lo que significa que si dos curvas que pasan a trav3s de un punto  $a$  de  $U$  forman un 3ngulo  $\theta$  (en el sentido de que las l3neas tangentes a las curvas en  $a$  forman un 3ngulo  $\theta$ ), entonces las im3genes de las dos curvas forman el mismo 3ngulo  $\theta$  en  $f(a)$ . Como una ramificaci3n de  $\log z$  es ...
