Standards ..., InformationWeek.com: News

analysis, commentary, and research for

business technology professionals., PCI

Express devices communicate via a logical

connection called an interconnect or link.A

link is a point-to-point communication

channel between two PCI Express ports

allowing both of them to send and receive

ordinary PCI requests (configuration, I/O or

memory read/write) and interrupts (INTx, MSI

or MSI-X).At the physical level, a link is

composed of one or more lanes., IEEE 1394

is an interface standard for a serial bus for

high-speed communications and isochronous

real-time data transfer. It was developed in

the late 1980s and early 1990s by Apple,

which called it FireWire.The 1394 interface is

also known by the brands i.LINK (), and Lynx

(Texas Instruments).. The copper cable it

uses in its most common implementation can

be up to 4.5 metres (15 ft) long., Share this
