Amazon.com FREE SHIPPING on qualified

orders, Fundamentally, there are two types

of control loops: open loop control and

closed loop (feedback) control. Control

theory is concerned only with closed loop

control., A control system manages,

commands, directs, or regulates the behavior

of other devices or systems using control

loops.It can range from a single home

heating controller using a thermostat

controlling a domestic boiler to large

Industrial control systems which are used for

controlling processes or machines.. For

continuously modulated control, a feedback

controller is used to automatically ...,
