4th-generation programming language (4GL)

or (procedural language) is any computer

programming language that belongs to a

class of languages envisioned as an

advancement upon third-generation

programming languages (3GL). Each of the

programming language generations aims to

provide a higher level of abstraction of the

internal computer hardware details, making

the language more programmer ..., Any

signal that can be represented as a variable

that varies in time has a corresponding

frequency spectrum. This includes familiar

entities such as visible light (perceived as

color), musical notes (perceived as pitch),

radio/TV (specified by their frequency, or

sometimes wavelength) and even the regular

rotation of the earth. When these signals are

viewed in the form of a frequency spectrum
