SOLUTIONS AND COLLIGATIVE PROPERTIES PDF - Search results, In chemistry, a solution is a special type of homogeneous mixture composed of two or more substances. The term aqueous solution is when one of the solvents is water. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent. The mixing process of a solution happens at a scale where the effects of chemical polarity are involved, resulting in interactions that ..., Chapter 12 Solutions solute + solvent ! solution speciation? stoichiometry? empirical solubility rules: Which ionic compounds are soluble in water? electrolyte definitions: strong electrolytes - soluble ionic compounds, 35 Solutions For example, 10% ethanol solution in water means that 10 mL of ethanol is dissolved in water such that the total volume of the solution is 100 mL., Freezing-point depression is the decrease of the freezing point of a solvent on addition of a non-volatile solute. Examples include salt in water, alcohol in water, or the mixing of two solids
