Read, highlight, and take notes, across web, tablet, and phone., The need for such simulation has been generated by the ever-increasing complexity of systems that are being designed, while the speed and capacity of modern digital computers have provided the means by which to expand simulation efforts., 5. Simulation can be used as a pedagogical device to reinforce analytic solution methodologies. 6. Simulation can be used to experiment with new designs or policies prior to implementation, so as to prepare for what may happen. 7. Simulation can be used to verify analytic solutions. 8., the â€œone system modeling anotherâ€™ account may suggest that simulation is a device for discerning what goes on ...
