EDUCATION STUDY MATERIAL Radio and
Television, A professional video camera
(often called a television camera even
though the use has spread beyond
television) is a high-end device for creating
electronic moving images (as opposed to a
movie camera, that earlier recorded the
images on film)., In cinematography, a jib is a
boom device with a camera on one end, and
a counterweight and camera controls on the
other. It operates like a see-saw, but with the
balance point located close to the
counterweight, so that the camera end of the
arm can move through an extended arc.
