In incremental learning, the student usually
remembers 95% of his or her top priority
material. That knowledge is relatively stable
and lasts in student's memory as long as the
process continues, and well beyond.,

Sigmund Freud (1856 to 1939) was the founding father of psychoanalysis, a method for treating mental illness and also a theory which explains human behavior., Incremental learning helps the student convert all forms of learning material into durable and lasting memories., In a kind of spooky experiment, scientists at the Max Planck Institute for Human Cognitive and Brain Sciences reveal that our decisions are made seconds before we become aware of them., You're not supposed to know about this but...
