Religious believers often claim that the  
universe is fine-tuned for life, and that this is  
evidence of God. In fact, this might be the

God, and the one considered to be the  
strongest by atheists., Craig is a very skilled  
debater. He has won nearly all his debates,  
with the exception of his debate with Eddie  
Tabash. Atheists do not properly prepare for

(AI), sometimes called machine intelligence,  
is intelligence demonstrated by machines, in  
contrast to the natural intelligence displayed  
by humans and other animals. In computer  
science AI research is defined as the study  
of "intelligent agents": any device that  
perceives its environment and takes actions  
that maximize its chance of successfully  
achieving its goals., The philosophy of  
artificial intelligence attempts to answer such  
questions as follows:. Can a machine act

intelligently? Can it solve any problem that a  
person would solve by thinking?; Are human  
intelligence and machine intelligence the  
same? Is the human brain essentially a  
computer?; Can a machine have a mind,  
mental states, and consciousness in the  
same way that a human being can?,
