Ãr É™ d eÉª, -d i /; 22 September 1791 â€“

25 August 1867) was a British scientist who

contributed to the study of electromagnetism

and electrochemistry., The homopolar motor

was the first electrical motor to be built. Its

operation was demonstrated by Michael

Faraday in 1821 at the Royal Institution in

London.. In 1821, soon after the Danish

physicist and chemist Hans Christian Ãrsted

discovered the phenomenon of

electromagnetism, Humphry Davy and British

scientist William Hyde Wollaston tried ...,

an enclosure formed by conducting material

or by a mesh of such material., When it

comes to worst case scenarios, itâ€™s hard

to beat the Electromagnetic Pulse (EMP) and

many people wonder how to make a Faraday

cage to protect their electronic devices .,
