Application Report SPRAA76â€“ January 2005 DSP Control of Electro-Hydraulic Servo Actuators Richard Poley..... DSP Field Applications ABSTRACT Hydraulic actuators

are characterized by their ability to impart large forces at high, Functions and properties. The primary function of a

hydraulic fluid is to convey power. In use, however, there are other important functions of hydraulic fluid such as protection of the

hydraulic machine components., Hydraulic engineering as a sub-discipline of civil

engineering is concerned with the flow and conveyance of fluids, principally water and

sewage. One feature of these systems is the

extensive use of gravity as the motive force

to cause the movement of the fluids. This

area of civil engineering is intimately related

to the design of bridges, dams, channels,

canals, and levees, and to both ..., Unit 7
