trading is a method of executing a large
order (too large to fill all at once) using

automated pre-programmed trading instructions accounting for variables such as time, price, and volume to send small slices of the order (child orders) out to the market over time. They were developed so that traders do not need to constantly watch a stock and repeatedly send those slices out manually., 2 For more information on Excelsior, please visit our website at www.excelsiormining.com.
