TROPOSCATTER BACKGROUND 2.1

Troposcatter Advantages The primary driver

for the development of troposcatter systems

was a need to establish a radio,

Tropospheric scatter (also known as

troposcatter) is a method of communicating

with microwave radio signals over

considerable distances – often up to 300

kilometres (190 mi), and further depending

on terrain and climate factors. This method of

propagation uses the tropospheric scatter

phenomenon, where radio waves at UHF

and SHF frequencies are randomly scattered

as they pass through the ..., Microwave

transmission is the transmission of

information or energy by microwave radio

waves. Although an experimental 40-mile (64

km) microwave telecommunication link

across the English Channel was

demonstrated in 1931, the development of

radar in World War II provided the

technology for practical exploitation of

microwave communication. In the 1950s,

large transcontinental microwave relay ..., 3

other forms of electromagnetic radiation,

normally travel in straight lines. Obviously

this does not happen all the time, because

long - distance communication depends on

radio waves traveling beyond the horizon.,

Communication technologies that are specifically designed to improve "live" HF keyboard operation can now be achieved which were previously only theory, too complex, or too costly to implement to be practical., LOCATION AND ENVIRONMENT CFS Alert, Nunavut is the most northern permanently inhabited settlement in the world. It is situated on the northeastern tip of Ellesmere Island in the Canadian Arctic, approximately 817 km from the geographic North Pole at coordinates 82°28' N, 62°30' W., Since 2011 the U.S Army is streamling its training and doctrine publications in accordance with the Doctrine 2015 Initiative. New series of documents have been added such as Army Doctrine Publications (ADPs), Army Doctrine Reference Publications (ADRP) and Army Techniques Publications (ATPs)., Dieser Artikel beschreibt die

Von dieser Besonderheit sind im deutschsprachigen ...
