Citation Maker - MLA, APA, Chicago,

Harvard, On the first page, the authors state,

“We have organized the discussion of

geology in this textbook around three basic

concepts ... (1) Earth as a system of

interacting components, (2) plate tectonics

as a unifying theory of geology, and (3)

changes in the Earth system through

geologic time.” The first 8 chapters (of 23)

cover the basics., This textbook integrates

concepts of chemistry, physics, and geology

in the context of the Earth as a system. It

introduces the processes driven by the

interior of Earth, including plate tectonics,

earthquakes, and volcanism, and

introduction to study of Earth materials.,

Understanding Earth doesn’t merely

present the concepts and processes of

physical geology” the authors focus on

how we know what we know., John
